

HOW-TO: Create an IBC Protocol Amendment

An IBC Protocol Amendment is required if there are changes to your currently approved IBC protocol, in order to remain in compliance with UK Administrative Regulations (UK AR 6.9, subsection IV A) and/or the NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules. Changes and/or modifications that must be reported include (but are not limited to):

- Lab Locations
- Lab Personnel
- Biological Agents or Materials
- Procedural Changes
- Genetic Constructs

Login to a-tune (<https://uky.a-tune.com/tickatlab/default.aspx>) using your UK linkblue account. Select "IBC".

Under "Files", select your IBC Protocol you want to amend from the list.

IBC#	File title	File created	File status	Last file status change	Expiration date	Document status
IBC-24-364	Testing	26-Mar-2024	Approved	27-Mar-2024	27-Mar-2027	Approved

Click on the "Document Title" with the most recent Version number and "Document Status" of Approved to open the IBC Protocol.

Document title	Version	Last document change	Last document checkout	Document status	Last document status change	Principal investigator
Testing	4.0	27-Mar-2024	27-Mar-2024	Approved	27-Mar-2024	Mazzetti, Delena W.

HOW-TO: Create an IBC Protocol Amendment

The screenshot shows a web interface with a 'Workflow' dropdown menu. The menu is open, showing options: 'Suspended', 'Amendment' (highlighted with a yellow box), 'Expired', 'Terminated', and 'Inactive'. A green arrow points from a text box to the 'Amendment' option.

At the top of the page, navigate to [Workflow] and select "Amendment" from the drop-down menu.

A pop-up will appear. The "Comment" field can be left blank or a brief explanation of the Amendment can be added. Click [OK] when done.

The screenshot shows a pop-up form with a 'Comment' text area, an 'Effective date*' field set to '27-Mar-2024', and 'Ok' and 'Cancel' buttons. A red box highlights the 'Click [OK].' instruction, and a green arrow points from a text box to the 'Ok' button.

****Ensure your browser's popup blocker is turned off.**

The screenshot shows a web interface with an 'Action' dropdown menu. The menu is open, showing options: 'Check-Out to Edit' (highlighted with a yellow box), 'Save', 'Save New Version', 'Print PDF', 'Compare version', and 'Validate & Save'. A green arrow points from a text box to the 'Check-Out to Edit' option.

Click [Action] and select "Check-Out to Edit".

The screenshot shows a web interface with a 'Policy' tab menu. The menu is open, showing options: 'Policy' (highlighted with a yellow box), 'General Information', 'Personnel', 'Training', 'Plants', 'Animal Research', 'Biological Toxins', 'Infectious Agents', and 'Recombinant and/or Synthetic Nucleic Acid Materials'. A green arrow points from a text box to the 'Policy' option.

Navigate through each section using the Tab menu.

Sign & Submit 

Navigate to [Workflow] and select "Sign & Submit". The PI will automatically be assigned as the "Signer" for their IBC protocol. Only the PI can complete this step.

IBC Protocol Submission Certification

- To the best of my knowledge, I affirm that all information contained herein is accurate and complete.
- I agree to comply with federal, state, and university requirements pertaining to handling, shipment, transfer, and disposal of biological materials.
- I agree to accept responsibility for the training of all personnel involved in this research and that all personnel have been trained and made aware of the risks involved.
- I affirm that I am aware of the NIH Guidelines and the BMBL and will follow appropriate biosafety level laboratory techniques in the research.
- I understand that all significant changes in agents, procedures/practices, and facilities must be reported in writing to the IBC and that IBC approval shall be obtained prior to implementation of these changes.
- I understand that unauthorized use of recombinant DNA, microorganisms, select agents, biological toxins, regulated and particularly hazardous chemicals, or deviation from an approved IBC protocol may result in the suspension of research privileges and/or disciplinary action.
- I agree to notify the IBC through the Biological Safety Officer as soon as possible and within 30 days of any significant problems, violations, or any research-related accidents and/or illnesses to the Biological Safety Officer.

Required Questions

The following activities apply to this IBC protocol registration: (*)

☒ Animal work (breeding, surgeries, etc.)

☒ Bacterial culture

☒ Cell culture

Any question with an asterisk (*), is a required question.

Required questions must be answered in order to submit the protocol.

Searching & Selecting Personnel

1. To search for and select Personnel, type their name and click [Apply filter].

2. If a User is in the system, their name will appear here. Click "Teams" to display the search results for the User's name.

3. The selected User's name will appear here. Multiple Users can be added.

Personnel Selection

▼ FILTER & SEARCH

Click a team to show the list of team members. Selection of the root-node "Teams" selected team (or within all users).

a-tune Tips & Tricks

Document Check-In & Check-Out

In a-tune, protocol files can be Checked-In and Checked-Out, similar to Library Books, so that only one User can actively edit the protocol. This prevents two Users from working in the protocol at the same time and saving over each other's work. If two(+) Users need to work on a protocol, then the Check-In and Check-Out feature will be important to familiarize yourself with below.

If you are editing a protocol and need to Check-In the document, navigate to [Action] and select "Save & Check-in" to allow another User to Check-Out and edit the protocol.

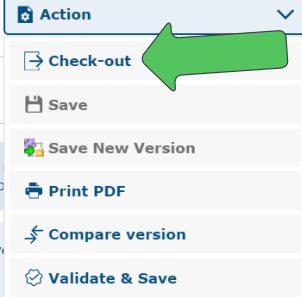

Attachments Action Workflow

- Save & Check-in
- Save
- Save New Version
- Print PDF
- Compare version
- Validate & Save

If you are viewing a protocol and the responses are greyed-out, you need to Check-Out the protocol.

To Check-Out a protocol, navigate to [Action] and select "Check-out".

Back to overview Review Attachments Action Workflow

PLANTS GENERAL

Please indicate below if your microorganisms, transgenic plants, insects and/or small animals associated with your research involve biological toxins, infectious agents, or recombinant and/or synthetic nucleic acid materials?

☐ Yes

Yes, this IBC protocol registration involves microorganisms affecting plants, insects and/or small animals associated with your research, or field trials.

Answer the questions below.

☐ No

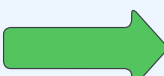

No, this IBC protocol registration does not involve microorganisms affecting plants, insects and/or small animals associated with your research, or field trials.

A Red-Arrow-in-a-Box symbol means the Document is already Checked-Out by another User. You cannot make edits until it is Checked-In.

Document title	Version
 Testing	1.0

When you Checked-Out a Document, this Green-Arrow-in-a-Box symbol will appear. This means that you are the only User that can edit the document right now.
